

NECS WORKSHOP IN PERTH

2 September 2009

Significant progress has already been made in developing the requirements for the National Electronic Conveyancing System (NECS). They are due to be finalised by the end of the year. Some of the major issues currently being considered include risk allocation, liability, client identification, the role of the paper certificate of title, implementation strategy and take up.

To find out what this means for you and have your say about it, join in our workshop where we will –

- Provide a brief background on NECS
- Explain how the requirements are being developed and their current status
- Discuss the legal framework for NECS
- Show how common data standards are contributing to NECS
- Talk about the next steps

The workshop runs from midday to 2.00pm with lunch provided. The venue is –

Cliftons,
Mezzanine Floor, Australia Place,
Cnr St George Tce & William Street , Perth
