

Notice to Surveyors

T1/2017

This notice is intended for surveyors who have not lodged plans through the new NLR-Plan Surveyor Portal

Changing the way plans are created and lodged with Landgate

As you may be aware, Landgate is reforming its registrations system. These reforms will affect the way surveyors create and lodge plans. Landgate will be moving away from the current PDF/CSD lodgement practice to a single digital file, lodged via the New Land Registry (NLR) system.

Landgate has been working with surveyors in the lead up to these changes by:

- establishing a surveyor working group, made up of seven surveying firms, which has been lodging plans via the NLR since September 2016
- inviting 15 surveying firms to lodge plans via the NLR in November 2016 as part of a 'soft launch'
- holding interactive NLR demonstrations at the 18 November 2016 South West Surveying Seminar in Bunbury and the 6 December 2016 WAIS Seminar at Curtin University.

To date, more than 500 plans have been successfully lodged via NLR and feedback has been positive.

Landgate wants to help surveyors prepare for the change; that is why you will be receiving another email from Landgate outlining the process and system requirements to submit your plans via NLR.

In the meantime, if you have any enquiries, please contact 9273 7373, select option 5 and ask for NLR Support. Alternatively, you may email rrp@landgate.wa.gov.au.
